

Infineon's Flash is field-proven in Automotive –
now it is conquering the world of Chip Card & Security

SOLID FLASH™

Certified Security. German Quality.

Quality has always been a matter of excellence for Infineon. That's why all major automotive players have been relying on our long-standing experience and proven track record in Flash applications for years now.

Security has always been a matter of excellence for Infineon. Our market-leading products are certified to the highest standards including EMVCo and CC EAL 5+(high). That's why they are used in security applications worldwide.

SOLID FLASH™ is the perfect fit for chip card & security applications that demand maximum flexibility - without compromising on quality and security.

SOLID FLASH™ products are ideal for:

- Credit & debit cards
- Mobile payment devices
- Public transport cards
- e-Passports / e-ID cards
- e-Driver's licenses
- e-Healthcare cards

Infineon. Setting industry trends for 25 years.
