

tent data with the intention of providing access in the same manner as a traditional block input/output (I/O) hard disk drive.

SSDs are different from traditional HDDs, which are electromechanical devices containing spinning disks and movable read/write heads. SSDs, in contrast, use microchips that retain data in non-volatile memory chips and contain no moving parts. Compared to electromechanical HDDs, SSDs are typically less susceptible to physical shock, are silent, and have lower access-time and latency. These are, however, more expensive per GB. SSDs use the same interface as HDDs, thus can easily replace them in most applications.

Computer interfaces

There are various interfaces for a PSD to connect to the computer for transferring information.

Various connectivity options available these days are USB 2.0, USB 3.0, FireWire 400 or 800, or eSATA interface. USB 3.0 is the fastest interface available till date offering a speed up to 5GB/sec. The speed and efficiency of your PSD also depends on your system configuration.

Buying tips

There are various factors which you should keep in mind before investing in a PSD.

PC/laptop compatibility. Check out what fits into your laptop/PC. Also check your system configuration before making a purchase.

Read/write speeds. The chosen interface's ability to read/write data with minimal latency affects the functioning of your PSD. It really depends on what your system is, and how much money you would like to spend. Firewire and USB are the two fastest interface types, with USB being the most commonly used interface.

Choose the size carefully. Bear in mind the amount of data that you are likely to cram in.

Kingston DataTraveler Ultimate 3.0 Generation 2 (DTU30G2)

Features

- Company: Kingston
- USB 3.0 Flash drive with read speed up to 100MB/s, and write speed up to 70 MB/s. When plugged into a USB 2.0 port, the drive has read and write speeds of around 30MB/s
- Dimensions: 73.70x22.20x16.10mm³
- Five-year warranty

Price: 32GB – ₹ 4595

Iomega SSD Flash drive

Features

- Company: Iomega
- USB 3.0 compatibility with write speeds up to twice as fast as 7200 RPM SATA hard drives. Backward compatible with USB 2.0
- 256-bit hardware encryption built-in for your data security (PC only), Protection Suite software via download with antivirus and backup
- Operating system: Compatible with Microsoft Windows Vista/XP Home / XP Professional / Windows 7 (32-bit), 256MB RAM or higher as required by operating system Mac OS X Tiger, Leopard, Snow Leopard (requires reformatting)
- Maximum read speed – up to 265MB/s; maximum write speed – up to 215MB/s, MTBF – 1.2 million hours
- Dimensions : 10.5x69.1x9.4mm³; Weight 0.11kg
- Three-year warranty with product registration

Price: 64 GB – ₹ 11,000; 128 GB – ₹ 19,900; 250 GB – ₹ 36,000

Velox series V20 SSD

Features

- Company: Silicon Power
- 6.36cm (2.5-inch) SSD with continuous read speed of up to 285MB/sec and write speed of up to 275MB/sec per second.
- Dimension: 100x69.85x9.4mm; Weight: 70gm
- Uses SandForce controller's patented Dura-Class technology and can extend the SSD's lifespan up to five years
- Three-year warranty

Price: 40GB – ₹ 6670; 60GB – ₹ 6360; 120GB – ₹ 9960; 240GB – ₹ 20,540

Note: Some products carry estimated market price which may vary as per taxes
