

range depending upon the size and nature of the material which threads through the 'pass' opening provided in the sensor.

The sensor has a built-in mounting facility and can accept pass-through of line-produced materials like bars, wires and strips. Presence or absence of the material gives a solid-state output with LED indicating the change.

LED-based luminaires

Binay Opto has come up with dome-type, high-bay PowerLED luminaires.

These LED-based luminaires have a lifespan of 50,000 hours (to 70 per cent

lumen maintenance) and 100,000 hours (to 50 per cent lumen maintenance). The light emitted has no infrared or ultraviolet content.

The luminaires work off 100-260V AC at 50 Hz and offer dielectric protection of 1.5 kV.

Single-board computer

Kontron has expanded its PC/104 portfolio with a dual-core PCI/104-Express single-board computer.

The MICROSPACE MSM-LP is available with single-core Intel Atom processor D425 or dual-core Intel Atom D525 processor. A version for the extended temperature range of -40°C to

+85°C is also available.

All versions of the PCI/104-Express offer hyper-threading for multiprocessing applications. Two

Gigabit Ethernet connections, executed via Intel 82547L and 82567 controllers, allow vertical networking without additional expansion cards. Four USB 2.0 and four serial interfaces (RS232/422/485) allow direct connection of application-specific peripheral devices.

Acrylic conformal coating

CONINSPUNE has come up with a flexible, transparent and eco-friendly acrylic conformal coating for PCB assemblies. Approved by C-DOT, the coating has a high dielectric strength and provides protection against high-voltage arcing and corona shorts. It can be applied on both sides

of the PCB—soldering side and component side.

The boards may be heated to 55-60°C just before spraying. The coating can be removed using Conins Thinner AR.

Time-attendance and access control system

Matrix Comsec has introduced COSEC range of time-attendance and access control systems.

The biometric fingerprint and RFID card based system comes with Ethernet and Wi-Fi-based hardware architecture. It has a Web-based management

software that can monitor and control up to 1000 locations, 10,000 doors and 1,000,000 users in real time.

COSEC has a touch-sense keypad and dot-matrix LCD, pluggable card reader modules and centralised fingerprint distribution. It can take up to ten fingerprints per user and gives SMS and e-mail notifications.

Thermographic camera

Radical Scientific Equipments has introduced VarioCAM thermographic systems from JENOPTIK, Germany.

The 1.5kg handheld thermovision system features 1280x960 infrared pixels, thermal resolution of 3 mK, speed of up to 60 Hz, $\pm 1.5^\circ\text{C}$ accuracy up to 100°C and 16-bit dynamic range.

The thermographic camera's lens has focal ratio of 1.0 and it comes with standard off-the-shelf batteries.
