Indian chip market grows 28 per cent

India's semiconductor market grew by 28.3 per cent in 2010, according to a report by India Semiconductor Association (ISA) and Frost & Sullivan. This growth shows that global semiconductor market's cyclical trends have minimal impact on India.

The total semiconductor market (TM) in India is estimated at \$6.55 billion in 2010 and expected to reach \$9.86 billion in 2012, growing at a CAGR of 22.7 per cent from 2010 to 2012.

Mobile devices, telecommunications, information technology and office automation are the key drivers of the semiconductor market in India contributing around 82 per cent to semiconductor TM in 2010. Local manufacturing of telecom equipment by OEMs and EMS companies will propel related semiconductor consumption by 50 per cent during 2010 to 2012.

Government plans chip manufacturing units

The Indian government plans to establish two chip-manufacturing units at

Upadhyay is new BSNL CMD

Bharat Sanchar Nigam Ltd (BSNL) has appointed Rakesh Kumar Upadhyay as the chairman and managing director (CMD). Before joining BSNL, Upadhyay served as the CMD of Telecom Consultants India Ltd. He has rich experience in the fields of planning, projects, operation and business development.

SMART appoints vice president, Asia Pacific

SMART Technologies Inc. has appointed Al Monro as vice president, Asia

Pacific. The creation of this senior role reinforces the company's commitment to providing strength and direction in the market.

Lenovo rejigs management team

PC maker Lenovo India has made changes to its management team. Rajesh Thadani, who has been leading the consumer business unit and reporting to Alex Li, will now independently handle the segment. Rajiv Rao, a former Dell executive, has joined Lenovo to lead its SMB business. Hunter Zhou will head services support division.

an investment topping Rs 250 billion.

Right now, there is no chip manufacturing facility in India. The facilities will be set up either exclusively by the Defence Research & Development Organisation (DRDO) and a defence public sector unit or through a public-private partnership.

Plans include setting up of a semiconductor unit with established technology to support fabrication of chips to meet the requirements of

high-volume products, as well as the requirements of fab-less design companies on pay-per-use basis. This activity may involve either setting up a plant in India with established technology, or acquiring an existing fabrication abroad and its eventual relocation to India.

Andhra Pradesh to have electronic hardware SEZ

While Andhra Pradesh has emerged amongst top four destinations in the software industry, it lags behind in electronic hardware with only two per cent of the country's hardware exports. A special package recently announced by the state government is likely to give its electronics industry the much needed boost.

Andhra Pradesh government plans to develop an exclusive electronic hardware special economic zone (SEZ) near the Rajiv Gandhi International Airport at Shamshabad. The SEZ will have common facilitation centre and full-fledged testing facilities.
