

provided the technology for the installation.

Tata Power is also working on a 25MW project in Mithapur, with building work set to begin at the end of the year. Electricity generated will be sold to Gujarat Urja Vikas Nigam under a power purchase agreement.

IBM teams with BEE for smart grid project

IBM has collaborated with the Bureau of Energy Efficiency (BEE) for India's first smart grid project. Together they will perform a cost-benefit analysis for smart grid activities as part of the National Mission for Enhanced Energy Efficiency (NMEEE).

A BEE project, NMEEE is one of the eight national missions that promote innovative policy and regulatory regimes, financing mechanisms and business models that help sustain the market for energy-efficiency.

As part of this collaboration, IBM will generate the smart grid business case and tools that will help calculate the return on investment for all smart grid projects being rolled out country-

Awards

National Telecom Awards 2011 presented

CMAI Association of India recently gave away the 5th National Telecom Awards (NTA) in partnership with Star News.

The awards felicitated the best telecom professionals and services, best telecom companies, service operators, R&D and innovations. Some of the awardees were BSNL (largest broadband operator), HCL Infosystems (best telecom support services company), AIRCEL (value-added service innovation), Bharti Airtel (innovative broadband service provider), Wipro (excellence in infrastructure for application services), Ericsson India (largest telecom equipment manufacturer), United Telecoms (excellence in R&D in manufacturing), Micromax Informatics (largest mobile phone Indian brand) and Lava (fastest growing mobile phone Indian brand).

Applauding the efforts of the entrepreneurs, Jyotiraditya Scindia, minister of state for commerce and industry, emphasised on the need for domestic manufacturing in the telecom sector. "The credit for the achievements of the telecom industry goes to the entrepreneurs. However, we should now dedicate ourselves to the manufacturing sector. Also, the government and private sector should work on the public-private partnership (PPP) model to attain greater heights," he said.

Nano Ganesh bags IIGP 2011 award

Ossian Agro Automation's Nano Ganesh has been selected as a winner at the *India Innovation Growth Programme (IIGP) 2011*. Developed by Pune-based entrepreneur Santosh Ostwal, the mobile-modem device allows farmers to operate their distant, electric irrigation pumps from remote locations without the need to travel long distances.

Digi-Key named catalog distributor of the year

Electronic components distributor Digi-Key Corporation has been named TE Connectivity's *2010 Global Catalog Distributor of the Year*. This is the second award TE has presented to Digi-Key in recognition of the company's global distribution of TE products. Digi-Key received the award based on sales growth, performance, demand identification and creation, customer expansion, cash improvements and cost reductions/operation efficiency gains.

Toshiba to start manufacturing in India

Toshiba Corporation is planning to set up a manufacturing facility in India besides starting contract manufacturing of LCD televisions, refrigerators and washing machines. The company also plans to increase its market share in the TV segment to three per cent from one per cent by selling 300,000 units in fiscal 2011.

LG eyes 32 per cent share in home entertainment

Korean consumer durables and electronics major LG Electronics is expecting India to emerge as its second biggest market over the next five years. It is eyeing a 32 per cent market share in home entertainment products and Rs 200-billion revenue from India by this year-end.

Renesas Mobile opens R&D centre

Renesas Mobile Corporation has set up an R&D centre for 2G, 3G and 4G modem technologies in Bengaluru. "Renesas Mobile India is contributing in every aspect of product creation from 3GPP standardisation, to system design, to implementation and customer support, and is a full-capability R&D centre," said Allan Frederiksen, managing director, Renesas Mobile India.

Kavveri Telecom forays into 4G technology

Kavveri Telecom has forayed into 4G technology by launching a linearly polarised CPE antenna in North American markets. "This product has been designed and developed by Kavveri's research and development department in India for the requirement of the cellular operators in North America for the LTE (4G) markets with an investment of Rs 35 million," said Shivakumar Reddy, managing director, Kavveri Telecom.

wide and also within the International Smart Grid Action Network, of which BEE is a member.

Wind River to set up India design centre

Wind River, a wholly owned subsidiary of Intel Corporation, plans to establish a design centre in Bengaluru in order to cater to the local needs of its customers in the areas of avionics and defence.

"We have hired people to head the centre," said Jim Douglas, senior vice-president, corporate marketing, Wind River.

"There had been requests from our customers for providing India-specific solutions beyond technology. The India centre would explore opportunities in the services segment and localisation in the areas the company operated," he added.
