

LED Offerings by Some Companies

Name of the manufacturer	LED commercial lighting products	Key features	Standard that the products comply with
AMKA Lighting	Power LED lamps, LED recessed downlights, spotlights, surface lights, LED tubelights and bulbs, track lights, flexible strip lights, midbay and highbay lights, foot lights and brick lights	Good quality and reliability	ISO 9001
Amptek LED Lighting	LED downlights, LED wall washers, intelligent LED-based DMX lighting solutions, LED track lights, LED core lights, etc	Competitive pricing, up to 3 years' warranty, latest designs, customised products	ISO 9001: 2000, proper IP ratings followed and RoHS-compliant components
Avni Energy Solutions	LED downlights, LED 2x2, LED 1x1, MR16, focus lights, high bay lights, etc	Energy efficient and high power factor (>0.9), total harmonics distortion of less than 15 per cent; higher lumens output (220 lm at 1A) with fewer number of LEDs	Does not contain mercury or other harmful metals; RoHS compliant; IP 44 to IP 54
Binay Opto Electronics	LED downlights, cove lights, mood lights, building facade lights, RGB effect lights (capable of generating up to 16 million colours), underwater lights, spotlights, LED tubelights and bulbs, high bay lights, etc	Designed as per Indian conditions, lifespan of 10 years +, 50 to 75 per cent lower power consumption than existing technologies, 5 years' warranty	ISO 9001:2000
Candela Lighting Systems	Downlights, track lights, spotlights, cove lights, inground uplighters, lamps, floodlights, etc	Saves 90 per cent energy cost, 100,000-hour life, low maintenance	CE, RoHS, at par with ISO standards
GlacialTech Inc.	Panel lights (595 x 595 mm ²)	Elegant structure, designed to dissipate heat	CE/FCC/ETL (applying)
Hovel LED Lighting	MR 16, ceiling lights, downlights, RGB lights, cove lights, wall washers, etc	Competitive pricing and reliability	—
MIRC Electronics	LED tubelights, downlights, ceiling light panels, direct and indirect lights, etc	Non-glaring LED lights with high light output	Following ISO and the standard fixed by Onida
Olive Exports	LED bulbs, LED stitching machine focus lights, downlights, tubelights, ceiling lights, bay lights, etc	Products made in India as per Indian requirements	All specs with IP grading, and as per specs and standards required by the client
Rachamalla Lighting Solutions	LED luminaire for outdoor area lighting (parking lots, parks, yard lighting), streetlighting and low bay industrial lighting	High-quality aluminium pressure die-cast enclosure for better heat dissipation, IP-66 protection, aesthetically designed. CREE LEDs are used for a system efficacy of 80 lumens/watt	Tested at an accredited lab in the USA as per LM-79 (approved method for electrical and photometric measurements of solid-state lighting products as published by the Illuminating Engineering Society of North America (IESNA))
Sanarti	LED bulbs, tubelights, architectural lights, ceiling lights, facade lights, spotlights, etc	—	ISO 9001: 2008, ESCO (BEE), IEC standards
Sujana Energy	Troffer lights, downlights, LED bulbs, low bay lights, high bay lights, canopy lights and floodlights	Products with higher lumen efficacy and high photometric footprint	Products are RoHS-compliant also meet International Electro-technical Commission (IEC) standards

contact area with the heat-sink. This is an excellent solution for bulbs, wall washers and flood lights," says Pradeep G. Kamath, vice president, Spectra Innovations India—a distributor for Samsung LED components in the Indian market.

Cree has recently launched XLamp XM-L LED—a single-die white-lighting LED. It is 20 per cent more efficient than XLamp XP-G at the same current, and can deliver 1000 lumens with 100 lumens per watt efficacy, claims the company. "Its wide viewing angle, symmetrical package, unlimited floor life and electrically neutral thermal path

could make a lighting product more energy-efficient and powerful," explains Shyam Mishra, sales manager, India, Cree Hong Kong.

Cree's XLamp MT-G LEDs are optimised for 35-50W halogen MR16 retrofit bulbs and for accent, track, display and down lighting. These feature Cree's EasyWhite technology and deliver consistent colour in a small, highly-efficient package.

"XLamp MT-G LED is the first in the industry to be binned and tested at 85°C and it can simplify luminaire design calculations and speed time-to-market. With a 9x9mm² footprint, the

MT-G LED delivers up to 560 lumens at 1.1A at 85°C or up to 1525 lumens at 4A at 85°C in warm white (3000K)," informs Mishra.

Philips Lumileds' Luxeon solution addresses luminaire manufacturers' and lighting designers' concerns over white-light consistency and uniformity, and simplifies the design process for LED solutions. The Luxeon H high-voltage emitter is driven directly with rectified AC voltage rather than constant DC current. ●
