

Why Relicell is the Right Battery for You

Part of a Rs.1000 crore IT industry group

Wide range to suit any application

VRLA Batteries - 12V 7AH to 250 AH

Tubular Batteries - 12V 40AH to 210 AH

Tested and certified by Central Power Research Institute, Bangalore (CPRI) and Electronic Test and Development Centre (ISTQC Directorate, Ministry of Information Technology, Govt. of India). **Download Test Certificates at**
www.relicellbattery.com

UL Certified

VRLA Batteries approved and registered in DGS&D for government purchases

47 Service Centres across India - Assured single window service support across India and countrywide installation support.

Projects on Robotics

Where can I find articles on robotics-based projects covering their design and programming?

Sneha Jujare
Hyderabad

EFY: You may refer to the following articles:

1. 'Automated Line-Following Robot' by Biswajeet Patra and Jagbandhu in EFY Sept. 2009

2. 'PC-Based Mobile Robot for Navigation' by Akshay Mathur in EFY Oct. 2008

3. 'Cell Phone Operated Land-Rover' by Susam Rahul K. and Raghavendra Prasad P. in EFY July 2008

4. 'Microcontroller-Based Infrared Tracking Robot' by Nishanth Ulhas Nair in EFY April 2007

5. 'Remote-Controlled Land Rover' by K.C. Bhasin in EFY June 2006

Some good projects are also available from EFY associates Kits'n'Spares. You can reach them at shyam.pandey@kitsnspares.com. You may also like to join the hands-on training course in robotics conducted by EFY Tech Centers at Delhi, Hyderabad and Bengaluru. For details, visit www.efytechcenter.com

Vacuum Tubes

In reply to the query of Rachit Pradhan on the availability of vacuum tubes under 'Letters' section of February issue, I would like to add that BEL-make ECC83 is a 12Ax7 equivalent. 12Ax7 can also be replaced with a low-noise ECC82. Both of these are 9-pin vacuum tubes and readily available in some shops of Kolkata, Delhi and Mumbai.

AVR Development

The construction project 'A Beginner's Guide To Atmel AVR Development' published in January issue was really interesting. Please publish an in-system programmer (ISP) circuit for the AVR microcontroller along with the monitor program in the coming EFY issue.

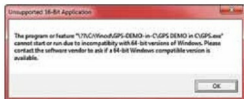

Swati Deshmukh
Mumbai

Projects invited

We invite ingenious and innovative electronic circuit ideas, DIY (do-it-yourself) and software projects for publication in EFY. Suitable honorarium will be paid for deserving contributions. You may send complete project details to the 'Editor, Electronics For You, D-87/1, Okhla Industrial Area Phase 1, New Delhi 110020, or e-mail to editsec@efyindia.com. For editorial guidelines, visit the link '<http://electronicsforu.com/electronicsforu/articles/WI-EDT.pdf>'

GPS Demo

In the 'GPS Demo' software project published in EFY Dec. 2010, when I downloaded the `gps.c` code and executed the program in Code::Blocks compiler (an Open Source IDE, config-

Error message

ured for GNU), I got an error message as shown here in the screenshot. I also changed to Borland C++ compiler but in vain. Please help.

Vinod Kumar G.

Qualcomm India, Hyderabad

The author Manuj Arora replies:

1. The program is in executable mode, so you don't need the compiler.

2. Right-click the executable file, go to 'Properties' option, select 'Compatibility' option, tick the box against 'Run this program in compatibility mode for' and select the mode.

I think you are accessing the code in Windows 7 operating system. Sometimes problems occur on Windows 7 because the system files are incompatible and some of the header files are inaccessible.

ERRATA

In EFY Report 'Key Component Distributors in India' published in February issue, the turnover of Millennium Semiconductors was wrongly printed as Rs 20 million. Readers may please read it as \$20 million.
