

Awards

EFY Awards 2010 announced

The winners of 'EFY Readers' Choice Awards 2010' were announced recently at the *EFY Expo 2011*. The awards were given in 26 different product categories. EFY Group also announced jury awards under 'lifetime achievement,' 'electronics man of the year,' 'electronics organisation of the year' and 'SME of the year' categories to recognise excellence in contribution to the Indian electronics industry. The jury comprised senior executives from nine industry associations including ELCINA, CEAMA, LEDMA, ISA and TEMA among others.

The 'Lifetime Achievement Award' was conferred on Gulu Mirchandani, chairman, Mirc Electronics. K. Subramanya, CEO, Tata BP Solar, was adjudged the 'Electronics Man of the Year.' Tejas Networks walked away with the 'Electronics Organisation of the Year' award and Deki Electronics won the 'SME of the Year' award.

Su-kam bags ISA Technovation Award

Su-Kam, a power back-up company, has won the *ISA Technovation Award 2011* for excellence under solar/energy category for its product 'Solar Power Conditioning Unit.' The award was received by Kunwer Sachdev, managing director, Su-Kam Power Systems, at the awards ceremony held in Bengaluru.

identification and security solutions.

New package for electronics industry under consideration

The government of India is considering a special incentive package scheme to boost production of electronics in the country. The new special incentive package under consideration would make India less dependent on imports of electronic components, systems and products.

"Electronic system, design and manufacturing can propel the country towards global leadership. India has been the leader in business process and IT outsourcing. Time has come to demonstrate our leadership position by building our own capabilities in integrated circuit (IC) design, IC fabrication, and design and manufacturing of electronics products," said Dr Ajay Kumar, joint secretary, Department of Information Technology (DIT), at the *ISA Vision Summit 2011*.

"Chips, chip components, accessories, assembly, testing would all be sought to be stimulated. The idea is to provide financial incentives to all units in the value chain," he added.

EFY Expo 2011 concludes successfully

Electronics For You Expo 2011—the first national-level mega electronics event of EFY Group—has set new

benchmarks of success. Held at Pragati Maidan, New Delhi, from February 17 to 19, the event saw participation of 10,000-plus visitors, 500-plus conference delegates, 300-plus media house's coverage, 250-plus exhibitors, 50-plus partners, 15 Indian innovators and eleven sponsors. It was blessed to have strong support of prestigious associations and leading organisations, with ELCINA as the 'exhibition and knowledge partner.'

EFY Expo brought the entire electronics ecosystem under one roof, offering immense business opportunities. Key events at the expo included CEO Summit, focusing on business opportunities for the Indian electronics industry; Design Engineers' Conference, having a panel of international experts sharing the latest technology trends that can help engineers to design and innovative products faster; seminar on Best Practices in Electronics Manufacturing; MAIT seminar on eWaste Management and Green Practices; and an IEEE seminar where industry experts updated faculty and students from leading engineering colleges about the latest technology trends and upcoming sectors with promising career prospects.

RS Components supports EFY Expo as platinum sponsor

RS Components, a reputed global distributor of electronics and maintenance

products, supported *Electronics For You (EFY) Expo 2011* as the Platinum Sponsor.

"Our association with EFY since its inception has been really beneficial. Our target customers are design, R&D and prototype engineers, and therefore we could not have asked for a better platform than EFY Expo. EFY Expo gave us the right platform to reach all those electronics engineers who can be benefited by using new innovative tools and products launched by RS Components," said Shiv Bhambrni, chief executive officer, RS Components.

"RS, like always, has recently come up with another exciting tool for PCB designing known as 'DesignSpark PCB,' which is freely downloadable from our website. Keeping the visibility factor in mind, we decided to support the expo," he added.

Beetel to focus on tier II, III cities

Beetel Teletech, a Bharti Group firm, will focus on tier II and III cities of India to boost its presence in the \$1-billion IT peripherals market.

The maker and distributor of landline phones and mobile handsets is planning to tap into its service centres in 130 cities and 1500 channel partners to expand its IT peripheral business market that includes headphones, speakers, woofers and webcams. The company entered this space last September and sells a wide range of data cards, among other things, and distributes memory products of Transcend.

"In the next two years, we want to be among the top three players in the this segment," said Vinod Sawhny, Beetel executive director and chief executive officer.

Dell launches laptop battery recycling programme

Consumers can now get their old lithium-ion laptop batteries recycled and contribute to reducing e-waste with the launch of Dell's free laptop-battery recycling programme in In-
