

HCL bags contract from BSNL

HCL has bagged an order worth Rs 2.5 billion from state-run Bharat Sanchar Nigam Ltd (BSNL). As per the agreement, the IT company will deploy a printing facility and manage BSNL's customer bills. In addition, it will make capital investment to upgrade the existing systems for higher efficiency.

Indus to add 5000 telecom towers every year

Indus Towers plans to add nearly 5000 telecom towers every year for the next five years and clock a revenue of \$2 billion this fiscal. "Currently, there exists a huge opportunity for tower companies in servicing the needs of 3G and BWA along with addressing the needs of new operators which are going to deploy their networks. This effect would gradually transcend to smaller cities and rural areas," said B.S. Shantharaju, chief executive officer of Indus Towers.

Amkette has adopted an orange-colour logo with letter 'A' that represents a stylish 'at the rate,' reinforcing its new image as a modern, technology-driven and consumer-friendly company.

EFY Tech Center ties up with Agilent

EFY Tech Center, the training arm of EFY Enterprises, has tied up with Agilent Technologies India. The tie-up will empower its students by giving them industry-relevant exposure to professional-grade equipment from one of the leading test and measurement (T&M) players in the industry. The new lab with equipment from Agilent, called EFY Tech Center-Agilent Lab, will come up at the Delhi centre.

Since its inception in 2007, EFY Tech Center has been imparting practical, short-term certificate courses to students from engineering colleges and professional engineers from organisations like ESTC and NTPC. With its hands-on training courses on the basics of electronics, robotics, microcontrollers and PCB design, EFY Tech Center fills the gap between the industry and the class room, preparing students to be industry-ready.

"We are happy to have our labs equipped with Agilent's advanced test instruments. This will not only enhance our lab but also reinforce

engineers' knowledge base by exposing them to the broadest range of innovative and latest measurement solutions in the industry," says Ramesh Chopra, managing director, EFY Enterprises.

Dish TV aligns with aadhaar

Dish TV has aligned with aadhaar—a 12-digit unique number which the Unique Identification Authority of

the industry that a DTH operator will be acknowledging the UID number as an 'officially valid document' for installation and subscription of its services.

"Not only will this be of convenience to consumers across the nation, the move will also facilitate the reach of digital content into far out and rural areas of the country where establishing proof of identity is a predicament. aadhaar will also serve an additional payment option to Dish TV as the UID has a direct connect to the banks and financial institutions," said Salil Kapoor, chief operating officer, Dish TV.

Nokia smartphones to use Windows Phone 7

Nokia has decided to switch from Symbian to Microsoft's Windows Phone 7 operating system in its future smartphones. In addition, the Nokia devices unit has been split into two business units to address smartphones and low-cost phones separately.

The changes made at Nokia will begin immediately and are likely to take two years to completely get incorporated as the two companies try to merge their mobile service ecosystems and product development roadmaps.

"With Nokia taking over the Windows Phone 7 universe, the other

OEMs who have initially supported Windows Phone 7 may rethink their commitment, and eventually end support of Windows Phone 7 the way they did with

Nokia smartphones to support Windows Phone 7 soon

India (UIDAI) is issuing to Indian residents as a 'Know Your Customer' (KYC) validation for address and identity proof. It is for the first time in

Symbian, due to Nokia's dominance and influence over the platform," says Kevin Burden, ABI Research mobile devices vice president.
