

ARROW ELECTRONICS OFFERS "PRODUCTS AND SOLUTIONS FOR INDIA MARKET" BASED ON LOW PIN COUNT 8-BIT MCUS FROM FREESCALE SEMICONDUCTOR

Key Features and Benefits:

- Available in pin counts from 8-pin to 28-pins.
- All the Devices are available in Industrial temp grade of -40 C to +85C.
- Any time Ex-stock availability of parts in Singapore and India warehouses.
- Flexible billing options in either USD or INR with local stocks available across India.
- Free Development software available.

Target Applications:

UPS/Inverters	Motor control	Lighting	Dimmers
Weighing Scales	Stabilizers	Remote controllers	Industrial timers
Water purifiers	SMPS and Chargers	Consumer Products	Access controls

Ready to Manufacture Design Support:

Ready to manufacture Designs available for following applications and customized support on request.

■ Weighing Scale

- Advance filter algorithm with super fast moving average update of display.
- Gives 1g of accuracy for full range of weigh up to 40kg
- Auto-zero and Tare facilities

■ Inverter

- 600VA Sine wave Inverter
- 850VA Sine wave Inverter

■ Quasi Sine Wave Home UPS / INVERTER

- Having design on output power at 460W and 640W.

Other Products Supported are:

- 32-bit KINETIS MCUs - Represent the most scalable portfolio of ARM® Cortex™-M4 MCUs in the industry (www.freescale.com/kinetis).
- i.MX applications processor family (based on ARM9, ARM11 and ARM™ Cortex-A8 core technologies) for powering new applications in consumer, automotive and industrial markets that demand exceptional performance and energy efficient solutions. (www.freescale.com/imx).
