GAMING PCs DESIGNED TO THRILL

CORSAIR'S DREAM PCs PACK THE LATEST IN GAMING AND DIGITAL ENTERTAINMENT

Price: Ultimate Dream PC - ₹ 250,000
Gamer Dream PC - ₹ 99,000

Corsair has rolled out the 'Dream PC' line-up for gamers and power users.

These gaming PCs have been launched in three variants. Ultimate Dream PC, the top model, has a Blu-ray player, 55.9cm (2-inch) 3D LCD monitor, NVIDIA 3D glasses and Dolby 5.1 surround sound provided by Corsair HSI headset and M-Audio speaker set. It is powered by Intel's 3.4GHz Sandy Bridge CPU along with three NVIDIA SLI graphics cards from Zotac. It also houses two hard drives, one being Corsair's 120GB SSD and the other WD's 1TB HDD.

The second variant, Gamer Dream PC, sports lower configuration and comes with Intel's 3.1GHz Sandy Bridge CPU along with two NVIDIA SLI graphics cards from Zotac. On this PC, Corsair's 60GB force SSD and WD's 500GB HDD are somewhat lower than the Ultimate Dream PC.

The third variant, Custom Dream PC, gives the gamer the choice to pick up components according to his budget and customise the gaming PC.

HOME ENTERTAINMENT SYSTEM WITH GUIDED SET-UP

THE 2.1-CHANNEL BOSE LIFESTYLE 235 IS EASY TO SET UP AND USE

Bose has introduced the Lifestyle 235 home entertainment system featuring the new Gemstone ES 2.1 speaker system arrays. Each array includes three drivers—two facing forward and one positioned to the side. Together with Bose TrueSpace digital signal processing, these arrays create a broad and precise soundstage.

A hideaway Acoustimass module delivers powerful, low-note performance. ADAPTiQ audio calibration technology analyses and adjusts the system's sound according to the size, shape and furnishings of the room.

The system console recommends the right cable to use, has inputs that sense when a connection is made and provides confirmation to the user when the connection is

successful. The remote can be programmed to control various entertainment devices like Blu-ray players, cable boxes and digital media adapters. Once the system is set up, only the connected entertainment sources are listed on-screen, using names like 'Blu-ray player' or 'cable box,' rather than cryptic acronyms like 'HDMI 1' or 'COMPONENT 1.'

NEW TABLET PC

MICRO STAR'S WindPad 100W IS LIGHT-WEIGHT WITH LONG BATTERY LIFE

Price: ₹ 34,990

Micro Star International has stepped into the tablet computer market with its WindPad 100W tablet

PC featuring a low-power Intel mobile platform processor, 25.7cm (10.1-inch) multipoint touchscreen, dual video cameras, a G-sensor gravity detector and a light sensor.

The G-sensor gravity detector rotates the images automatically according to the position in which the device is held.

The tablet, rated to provide more than six hours of battery time, has external dimensions of 27.4×17.3×1.8 cm³. It is loaded with a complete array of input/output ports including an SD card reader, USB 2.0 slots and a mini HDMI port, to meet your entertainment needs. Weighing just 800 gm, it is the ideal mobile data centre for today's on-the-go generation.
