

Airtel's mobile wallet service

Paying your electricity bill without waiting in a long queue, buying yourself a coffee without cash or paying for groceries after forgetting your wallet at home—that's not just wishful thinking anymore, thanks to Bharti Airtel's mobile wallet service 'airtel money.' This one-of-a-kind service aims at providing customers with an efficient alternative to cash transactions. Currently, it is available in Gurgaon and will soon be launched across Delhi NCR and other key cities in India in a phased manner.

India's first local-search Android app.

Need to locate good eating joints around your area? Do it with Zomato.com's first 'made in India' local-search mobile application for Android phones. The application, which is available in the Android market for free, replicates all the features of the company's website and lets the user look at the menus, contact details, reviews, photographs, locations and discounts for restaurants on the phone itself. Zomato.com, the online food guide and restaurant directories' website, provides rating and reviews of all listed restaurants to its users.

Videocon d2h offers 19 new channels

Videocon d2h, the DTH TV arm of Videocon group, has added a total of 19 channels—on its platform—six in HD and 13 more Standard Definition channels. The 13 new channels are from genre like English entertainment, kids and infotainment. The channels in HD format are Discovery HD, NGC HD, Movies Now HD, Travel XP, HD Active Music and HD d2h Movies.

Action game powered by NVIDIA 3D Vision

NVIDIA has announced Bulletstorm—a blockbuster action game developed with Epic Games, Inc.'s Unreal Engine 3 (UE3) and its newly integrated NVIDIA 3D Vision technology. 3D Vision is NVIDIA's award-winning 3D technology, which delivers a stereoscopic 3D experience for gamers, movie-lovers and photo enthusiasts on desktop and notebook PCs.

COMPACT MEDIA PLAYER

ASUS O!PLAY MINI PACKS HIGH-DEFINITION CONTENT AND FEATURES IN JUST 175 gm

ASUS O!Play MINI media player features powerful decoders with support for most media formats to let you enjoy big-screen entertainment in your living room.

Measuring just 15.2×10.7×2.9 cm³ and weighing a mere 175 gm, the media player is loaded with features like smart subtitling, a 4-in-1 card reader and HDMI connectivity. It gives real HD quality for both video and 7.1-channel audio, as well as photo viewing.

The player presents video in 1080p HD through HDMI. It further supports Dolby TrueHD 7.1-channel audio decoding and pass-through. As a result, it allows formats like Blu-ray which rely on high-fidelity video and audio to

deliver their full potential.

RighTxT subtitle detection supports a wide variety of languages, and works automatically in real time as media plays to deliver accurate captions on-screen.

The 4-in-1 built-in card reader supports SD, MMC, MS and xD formats, allowing you to quickly display photos from almost any source on the big screen in native high definition.

SLIM MONITOR

LG's E90 LED MONITOR IS JUST 7.2mm THIN

LG Electronics India has launched an ultra-slim LED monitor, E90, in India. Claimed to be the slimmest with a thickness of just 7.2 mm, the monitor lets you watch action movies and sports with ease. With a response time of 2 milliseconds, its display remains bright and clear even during fast-moving action sequences. The Image Booster software enhances the quality of streaming content from various video sites.

The power supply and the socket connecting the monitor to the PC are on the back of the stand—an innovation called EZ cabling. With the reduced footprint offered by its light weight and slim size, the monitor manages to consume up to 40 per cent

less energy than conventional CCFL-backlit LCD monitors.
