

Robonova

Features

- Humanoid robot kit about 30x40x10 cm³ in size, weighing about 2.5 kg
- Available in kit form and also as ready-to-walk
- Exciting 16 degree-of-freedom humanoid robot kit offers a complete robot package
- Can be retrofitted with several accessory modules
- Can walk, run and do flips, cartwheels, dance moves

Price: Rs 62,000

particular application. However, if the cost is the most critical factor for you, it's better to go for raw spare parts and build the kit from scratch for a limited functionality. This at least will help you to ensure the build quality at a lower cost.

The steps for buying a robotic kit are:

1. First, decide what kind of kit you require. If you are a beginner, don't

go for a very advanced kit which you cannot understand. If you don't know programming, go for a kit which supports visual (or graphic) programming.

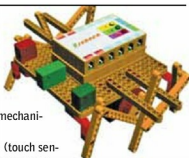

2. When going for robots for outdoor application, pay more attention to mechanical hardware and sturdiness. Also check the total weight of the robot and payload capacity.

3. When going for an autonomous kit, check the kind of sensors which

ROBOCO

Features

- Meant for those in the age-group of 14 to 30 years (high-school-level to engineers)
- Brick model, easy pluggable
- Flow-chart-based easy programming with 3D design graphics and mechanical simulation
- Interfaced with all kinds of sensors (touch sensor, IR sensor, Hall sensor, voice sensor, sonar sensor, etc)
- Extensibility controller with 4 motor driver and 8 input/output ports for each controller provided with four DC gear motors
- No limitation for making any kind of robot or automation prototype model
- Kit comes with 2 controller boxes, 4 motors, 4 wheels, 2 universal wheels, sensors and about 800 brick fixtures
- Provided with GUI software and 25 sample projects

Price: Rs 18,000
