Welcome friends! Wondering what goodies we have in the EFY-CD? Allow us to reveal all! There are three to four different categories of software that we feature every month, most important of which is the 'Design and Simulation' category. It comprises various electronics software, datasheets, e-books, circuit ideas and EFY software. The CD also contains three other sections: Resources, Fun and Utility. 'Resources' contains essential software like Acrobat Reader, Ezzip and a few others, which form the basic requirements of any PC. The 'Fun' segment includes computer games, whereas in 'Utilities' you will find multimedia and IDE software, Internet applications, etc.

LibreOffice is a free, high-quality, user-friendly and power-packed Open Source personal productivity suite for Windows, Macintosh and Linux. It comes with six feature-rich applications for all your document production and data

Sumatra PDF is a slim, free, Open Source PDF reader for Windows. It has a minimalistic design and is simple to use. The main attraction is its startup time.

PDFCreator is a free tool to create PDF files from nearly any Windows application. It works as a printer for any application.

AbiWord is a free wordprocessing program similar to Microsoft Word. It is suitable for a wide variety of wordprocessing tasks. AbiWord allows you to collaborate with multiple people on one document at the same time.
