

HIGH-END SOUND SINGLE CHIP SIMPLICITY

Introducing the new DAE-6 – the industry's first and only complete audio system on a single IC. Intersil's D2Audio has combined its unmatched digital audio amplifier technology with the industry's most respected discrete processing firmware, to produce the easiest-to-use and most powerful platform for creating unique and highly-differentiated audio products.

The new DAE-6 family offers three different pin-compatible levels of audio performance for easy design migration and flexibility. For those who want to provide the highest level of audio performance, the DAE-6 MightyCat™ line of ICs feature a locked-down tuning by world-renowned audio legend Mark Levinson.
