

Do-It-Yourself Repair and Troubleshooting Tips

Electronic devices are exciting to own but troublesome when it comes to repair. The fear, uncertainty and doubts associated with disassembling electronic devices hold us back from repairing them ourselves. Here are some websites that provide you useful information and tips on repairing and troubleshooting electronic devices

iFixit

This website provides free repair manuals and troubleshooting guides. Initially started for Apple products, it now provides step-by-step procedure along with supporting pictures and videos to fix problems related to any sort of electronic gadget through its thriving community of experts and repair technicians.

Fast Repair Guide

Fast Repair Guide provides repair and troubleshooting information for devices ranging from LCD monitors and computers to inverters and printers. A comprehensive resource with a database of useful articles and repair guides, it also provides links to electronics projects and components' datasheets. It has about 13,215 users in its online community, and is one of the most popular websites in the city of Ipoh according to Alexa.com, with maximum search queries related to LCD and plasma TV repair.

FixYa

In 2005, too many product manufacturers were neglecting post-purchase customer support. Frustrated by the lack of practical post-purchase information, entrepreneur Yaniv Bensadon set out to build a community resource capable of providing relevant and up-to-date troubleshooting data. Today, FixYa continues to empower individuals to repair and improve upon their already-purchased possessions. From fixing cars to cameras and iPhones, FixYans are part of a DIY revolution that helps empower techies, tinkers and hobbyists across the globe.

Do It Yourself

DoItYourself.com is an independent home improvement and home repair website that enables consumers to get personalised advice from professionals in over a hundred subjects. It was established in 1995 with a goal to provide consumers with unbiased home improvement and repair information in a community environment. With comprehensive how-to content and expertly moderated community forums, the website makes it easy to tackle even the most complex home improvement projects.

Electronic Repair Guide

Started in November 2006 by a Malaysian repair technician, this website is a useful resource that helps shorten the usually fairly steep learning curve for those who are new in the repair field. It uses the computer monitor as a guide to show how you can troubleshoot electronic problems easily.
