teenth in the world in terms of overall broadband subscriber numbers. And going by the current growth rate, it will rank among the top ten countries by the year-end.

According to the Broadband Forum, only China and the US had a faster growth in broadband subscribers than India in 2010.

India has a total of 12 million fixed-line broadband subscribers and another two to three million on the wireless platform. The government is also planning to roll out a nation-wide optic-fibre backbone network in order to ramp up the infrastructure.

Efforts to clamp down CPT imports

The Department of Revenue Intelligence has conducted raids on some importers of colour picture tubes (CPTs) suspected to be avoiding payment of anti-dumping duty (ADD). This duty was imposed in May 2009 to

protect the domestic industry from the damage being caused by under-priced imports from Malaysia, China, Korea and Indonesia.

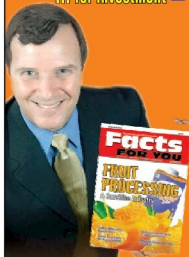

As per the import data from Directorate General of Foreign Trade, in spite of ADD, CPT imports to India increased from Rs 6440 million (4 million units) to Rs 7870 million (4.8 million units) between 2008-09 and 2009-10. During the first quarter of the current fiscal (April-June 2010), there was a huge increase to Rs 2590 million (1.6 million units), which works out to a growth of over 30 per cent.

After sustained efforts from industry players and ELCINA Electronic Industries Association of India, the Department of Revenue Intelligence has recognised the seriousness of the situation and taken a decision to book the manufacturers and traders/importers of CPTs who have been indulging in malpractices to nullify the impact of ADD.
