

# Add Wired and Wireless Connectivity to Your Design

## Microchip Offers Easy-to-use, Upgradable Product Solutions

### Wired and Wireless Connectivity

USB

Wi-Fi®

ZigBee®

Ethernet

MIWI™  
CAN

Easy to use • Low-cost • Start designing today

Microchip offers support for a variety of wired and wireless communication protocols, including peripheral devices and solutions that are integrated with a PIC® Microcontroller (MCU) or dsPIC® Digital Signal Controller (DSC).

#### Microchip's Solutions include:

##### USB

8-, 16- and 32-bit USB MCUs for basic, low-cost applications to complex and highly integrated systems along with free license software libraries including source code.

##### Ethernet

PIC MCUs with integrated 10/100 Ethernet MAC, standalone Ethernet controllers and EU1-48™/EU1-64™ enabled MAC address chips.

##### CAN

8-, 16- and 32-bit MCUs and 16-bit DSCs with integrated CAN, stand-alone CAN controllers, CAN I/O expanders and CAN transceivers.

##### LIN

LIN Bus Master Nodes as well as LIN Bus Slave Nodes for 8-bit PIC MCUs and 16-bit dsPIC DSCs. The physical layer connection is supported by CAN and LIN transceivers.

##### Wi-Fi®

Innovative wireless chips and modules allowing a wide range of devices to connect to the Internet. Embedded IEEE Std 802.11 Wi-Fi transceiver modules and free TCP/IP stacks.

##### ZigBee®

Certified ZigBee Compliant Platform (ZCP) for the ZigBee PRO, ZigBee RF4CE and ZigBee 2006 protocol stacks. Microchip's solutions consist of transceiver products, PIC18, PIC24, and PIC32 MCU and dsPIC DSC families, and certified firmware protocol stacks.

##### MIWI™

MIWI and MIWI P2P are free proprietary protocol stacks developed by Microchip for short-range wireless networking applications based on the IEEE 802.15.4™ WPAN specification.

#### GET STARTED IN 3 EASY STEPS

1. Purchase a development kit
2. Download the free software stacks
3. Order samples and start designing!
