

Falcon (800 VA)

Features

- High surge-withstand capability (up to 300 per cent)
- Pure sinewave output
- Instant switchover for the computer to run uninterrupted during power cuts, without rebooting
- Extra long back-up for computers
- Space saver
- User-friendly display of alerts
- Choice of various aesthetically designed models
- Option of castor-wheel-mounted trolley for easy movement
- LED display
- Saves 40 per cent electricity bill compared to squarewave inverters
- Smart overload sensing and short-circuit protection with auto reset

Price: ₹ 7400

For a small home with just two-three tubelights and one or two fans, 650VA is recommended. If you have larger loads to be attached—four-five tubelights and two-three fans—buy an 850VA inverter

case of mains failure.

For a small home with just two-three tubelights and one or two fans, 650VA is recommended. If you have larger loads to be attached—four-five tubelights and two-three fans—buy an 850VA inverter. If you plan to buy a higher-capacity inverter, look at the loads that you will be running simultaneously.

In general, various home appliances consume power as follows:

- Tubelight - 60W
- Fan - 70W
- Television - 120W
- Laptop - 100W
- CFL - 25W
- Modem - 50W

theatre systems, water motors and air-conditioners, a pure sinewave inverter is recommended. These inverters give a waveshape similar to AC mains' and,

unlike squarewave inverters, don't produce the humming noise from a fan or tubelight.

Calculating the inverter capacity

Decide the inverter capacity based on the power consumed by the appliances that you plan to run on the inverter in

UPS E² (875 VA)

Features

- Microcontroller-based, intelligent control design
- Highly efficient transformer, which helps in fast charging of the battery, increases the backup and saves energy
- Zero power switching; zero energy loss while conversion from DC into AC
- Display indications (status and fault)
- CCCV technology with auto trickle mode
- Smart overload sense and short-circuit protection
- Battery state monitoring
- Easily serviceable
- Digital fuzzy logic charging
- Multi-stage digital battery charger
- Mains input voltage range selection
- Intelligent thermal management

Price: ₹ 6990
