

Bravo (875VA)

Features

- Microcontroller-based design
- SMD technology for compact and reliable design
- Specially designed for low and moderate power-cut areas
- Dual battery charging option for flat plate and tubular batteries
- Free preloaded battery management software
- Regulated battery charging commences from 120V to 300V mains voltage
- Auto holiday mode preserves battery charge while you are away from home for a long time

So if you need to run two tube-lights, three fans, one TV and one laptop, you'll need a total power of 550W (=2x60 + 3x70 + 1x120 + 1x100) to support all of your appliances at the same time.

Now that you know how much power is required, it's easy to get the VA rating of the inverter. In ideal conditions, the VA rating would have been the same as the power need, i.e., 550 VA. But, practically, the power factor of inverter is less than 1. Hence the power supplied by a 550VA inverter would be lesser than 550W. Assuming the power factor of the inverter to be

0.7, you can arrive at the VA rating of the inverter as follows:

Required VA of Inverter $\times 0.7 = 550W$, or

Required VA of Inverter = $550/0.7 = 786 VA$

Buy an inverter that is of slightly higher capacity than you need at present as you will be able to run something else simultaneously, whenever required. So in the above example, an 800VA inverter will fit into your requirement.

Some appliances require extra load (called surge load) when these start up. While calculating the load require-

800VA Home UPS/Inverter

Features

- DSP-based
- Good wave form
- SMT technology
- Auto-sense intelligent control
- Automatic battery-condition sense charger
- Reverse battery, battery fuse blown
- Over-load/short-circuit indication
- High crest factor and hence high surge sustaining capacity

Price: ₹ 7490

BOOKS

Power Electronics & Its Applications

Second Edition
Alok Jain
Price: Rs. 240/-

Power Electronics: Devices Circuits & MATLAB Simulations

Alok Jain
Price: Rs. 315/-

Fundamentals of Microcontrollers and Applications in Embedded Systems

Ramesh Gaonkar
Price: Rs. 300/-

Parallel Port Complete

Jan Axelsson
Price: Rs. 330/-

45% Discount on following two books till stock lasts

USB Complete

Third Edition
Jan Axelsson
Price: Rs. 360/-

Serial Port Complete

Jan Axelsson
Price: Rs. 330/-

Programmable Logic Controllers & Industrial Automation

Madhuchandra Mitra
Samrajit Sen Gupta
Price: Rs. 200/-

Embedded Ethernet & Internet Complete

Jan Axelsson
Price: Rs. 390/-

Illustrated Programming with C++

Dilip Mali
Pranod Vasambekar
Price: Rs. 210/-

C Application Programs and Projects

Dilip Mali
Pranod Vasambekar
Price: Rs. 150/-

Elements of Artificial Neural Networks

2nd Edition
K. Mohotra, C. Mohan,
Sanjay Ranka
Price: Rs. 320/-

The Microcontroller Idea Book

Jan Axelsson
Price: Rs. 240/-
