Features

- 20 V V_{GS}
- $R_{DS(on)}$ as low as 4.6m Ω max @ $V_{GS} = 10\text{V}$
- Industry standard SO-8 and SOT-23 packages
- MSL1, Consumer Qualified
- RoHS compliant containing no Lead, no Bromide and no Halogen

The IR Advantage

- Minimum high-side drive circuitry
- Ideal for computing application with 12-20 V bus rail
- Lower conduction losses
- Multi-vendor compatibility
- Increased reliability
- Environmentally friendly
