

# KL UNIVERSITY THE PIONEER IN TECHNICAL EDUCATION

The innovations and successful steps which helped KLCE to become the pioneer of technical education 30 years ago, have now paved the way for it to become one among the international universities in the name of Koneru Lakshmaiah University (KLU). Various practices that lead to all-round development of students—systematic curriculum, scientific studies and research—are the hallmarks of the university.

KLU with many feathers in its cap like NAAC accreditation, flexible academic system, MoUs, personality development programmes, five-year integrated programmes and research is now ready to compete with the international arena.

NAAC has rated the university with a CGPA of 3.76 on a four-point scale. On the lines of international standards, flexible academic system has been introduced, in which the students can choose their own electives and attain a specialised degree in the due course of their B.Tech (4-year) programme. All the seven branches of this B.Tech programme (BT, CSE, CE, EC, ECE, EEE and ME) are recognised by AICTE. Five-year integrated programmes introduced at the undergraduate level give students the flexibility to complete B.Tech in ME with M.Tech in CSE, or B.Tech in EEE with MBA, within five years.

MOUs with other universities help the students to continue their B.Tech programme in a foreign university also, i.e., they can earn a foreign university degree also.

The other hallmarks include teaching through e-learning, Wi-Fi enabled campus with 110Mbps Internet connectivity and mandatory usage of laptop as per the designed course. With the support of IBM, ADOBE, MICROSOFT Excellency centres, the students are able to learn more on computer-based programmes at the campus itself. Lectures by foreign professors help the students to compete with the international standards.

Subjects in all branches of the programmes are regularly updated by consulting expert committees, which include senior professors from IITs, NITs, etc and also technical experts from the industries.

The dedicated Industrial Relations & Placement (IRP) Department spreads its wings to various cities like New Delhi, Chennai and Pune helping to yield the best results. To attain better placements, students are being trained by the Department Of Communication And Soft Skills. Courses are included in each semester of the curriculum to empower students in the area of communication and soft skills. 100% placement for the last consecutive seven years is the result of the strenuous efforts taken by all the departments.

Research is another top priority at KLU. The well-established research centres of each and every department help not only the students but also the faculty to improve their creativity, which is drawing the attention of universities from America and Australia

Shri Koneru Satyanarayana Garu, Chancellor

that are offering scholarships to the students. The hard work of the research wings has yielded results in the form of research projects from DRDO, DRDL and ISRO.

As all-round development of a student is needed to compete in today's world, sports are given an equal importance with studies and this is clear from the international standards that are maintained for the indoor and outdoor stadia in the campus. The other salient feature in sports is that KLU has the South Zone Status. Students are given the opportunity to compete at state and national level sports. Also, there are various facilities like gymnasium and yoga and meditation centres, and 24 hobby clubs.

The university has a 450-plus-strong efficient and dedicated teaching staff, of which nearly 100+ are PhD holders and many others are pursuing their PhD degree.
