Clock generator

Texas Instruments has introduced a highly integrated clock generator (LMK03806) that synthesises seven independent frequencies on fourteen outputs. With an output frequency of 2.37 MHz to 2.6 GHz, the LMK03806

provides clocking support for all of the components on a typical line card.

It features a high-frequency voltage-controlled oscillator, programmable output dividers, sub-50-femtosecond rms jitter at 312.5MHz output frequency, programmable LVDS, LVPCL and LVCMOS, and crystal interface.

PLL frequency synthesiser

Analog Devices has introduced a phase-locked-loop (PLL) frequency synthesiser that can be used to implement local oscillators as high as 18 GHz in the up-conversion and down-conversion sections of wireless receivers and transmitters.

The ADF41020 consists of a low-noise, digital phase-frequency detector, a precision charge pump, a programmable reference divider and high-frequency programmable feedback dividers. A complete PLL can be implemented if the synthesiser is used with an external loop filter and voltage-

controlled oscillator (VCO).

The synthesiser can be used to drive external microwave VCOs via an active loop filter. Its very high bandwidth means a frequency doubler stage can be eliminated, simplifying system architecture and reducing cost.

SECURITY

Colour dome camera

Sparsh has launched an elegant colour

technology offering 84.7cm (1/3-inch) Sony 960H CCD image sensor and 650 TVL resolution.

It features adaptive tone-curve reproduction for contrast correction in dark and bright areas, 2D noise reduction, preset on-screen display menu, motion detection, privacy masking function, high light compensation and camera ID function.

Fire alarm control panel

Esser by Honeywell has launched a modular fire control panel that offers

customised fire solution via hot redundant processor and power supply.

The FlexES Control complies with the detectors and field devices that are capable of voice-evacuation in case of fire. It comes with a 14.5cm (5.7-inch) TFT display with night design. One FlexES Control accommodates up to 18 analogue addressable loops, with 127 detectors and devices per loop in any combination.

LIGHTING

LED lamp with driver

GlacialLight has introduced the MR-1605WH-V2AN LED lamp and GP-HS05N driver bundle, as part of Mizar series of LED lighting products. The

5-watt LED lamp uses Nichia LED technology and has a rated lifetime of 30,000 hours. The lifetime is further prolonged by eliminating the need for an AC transformer and a DC-to-DC LED driver.

The MR1605WH-V2AN offers non-dimmable 50° beam. Two colour variants are available. The GL-MR-1605WH-V2AN-CW provides daylight illumination at 5000K with a colour rendering index of over 70, while the GL-MR1605WH-V2AN-WW illuminates with a 3000K beam and a CRI better than 80.

Solar LED streetlight

Darbari Green Energy Systems has come out with a solar LED streetlight in various options. The streetlight has SMF batteries mounted inside the light fixture to prevent pilferage of the bat-
