EMMVEE receives award for export performance

EMMVEE Group has received the Indo-German Chamber of Commerce award in the category of 'Outstanding Export Performance Economic Relations-2011.'

Nandeesh Kumar, finance director, EMMVEE Group, receiving the award from Prithviraj Chavan, chief minister of Maharashtra

Indo-German Chamber of Commerce is a trade promotion organisation providing single-window business. This is the second time that EMMVEE has

received this award in the last three years.

ISA's Technovation Awards 2011

The India Semiconductor Association (ISA) has announced the 'Technovation Awards 2011' to recognise and honour India's most competitive companies across the electronics ecosystem.

The awards to be held in December in Bengaluru are divided into three categories—intellectual property awards to identify the IP created in India and the companies behind them; the eco-system awards to recognise the companies which have taken the business risk to build the eco-system infrastructure in India; and awards for individuals associated with semiconductors.

Winning companies will get to demonstrate their products at ISA Vision Summit, scheduled for February 6-7 2012, in Bengaluru.

"As part of our enterprise expansion plans here, Huawei will focus on providing ICT solutions for sectors such as transport, energy, telecom and finance. In order to offer enterprise users premium products and services, Huawei will continue developing innovative enterprise networking products and solutions," said Eric Yu, president, enterprise business, Huawei India.

Annual Educator's Day 2011 focused on 'do engineering'

National Instruments (NI) along with Nurturing Innovation and Creativity in Education (NICE) Committee recently hosted the 10th Annual Educator's Day 2011. The two-day event witnessed participation of around 1000 students, professors, scholars and eminent academicians from across the country.

The event focused on the need to 'do engineering,' which plays a pivotal role in enabling students and teachers on the effective use of technology in education.

Jayaram Pillai, managing director, IndRA, National Instruments said, "En-

gineers should focus on core engineering, which has an immense potential for growth like IT. With this platform, we are inspiring engineers to do engineering rather than learn engineering."

DoT testing BlackBerry solutions

The stand-off between the security agencies and Research In Motion (RIM) looks coming to an end as Research In Motion (RIM) has suggested real-time interception of its BlackBerry Messenger and BlackBerry Enterprise services. The Department of Telecom (DoT) is testing the BlackBerry solution and has asked various security agencies to give their opinion on the solution.

RIM had sought almost a year's deadline for taking a stance on interception of its services. The government of India had set August 15 as the deadline for the Canadian manufacturer to provide the interception keys to the security agencies. The government wanted to track the popular BlackBerry messenger and corporate e-mail services in a readable format.
