

FLY FAST FLY EASY FLY LIGHT

STMicroelectronics

The widest and most accessible range of Microcontrollers in terms of cost, development environment and performance

STMicroelectronics boasts one of the broadest portfolios of microcontrollers in the industry. Our Value Line range starts with the STM8S family, which offers the most cost competitive entry level solution, and grows with your needs to the STM32VL, which offers powerful Cortex-M3 performance at a highly cost effective price.

Join us at our Microcontroller Seminars in New Delhi (5 Dec), Mumbai (7 Dec) as well as Bengaluru (9 Dec) and get hands-on learning on how our most accessible range of microcontrollers can also offer you the most comprehensive development environment with user friendly discovery kits and extensive software libraries.

Deadline: 21 Nov 2011

STM8 Value Line

- High-performance STM8 core with 16 CISC MIPs peak @ 16 MHz CPU
- 20, 32 and 48-pins packages
- Based on STM 130nm cutting edge technology
- Large set of embedded peripherals: UART, I²C, SPI, timers, 10-bit ADC, and debugging function
- Full compatibility and upgradability with existing STM8S Portfolio
- User friendly discovery kit for quick evaluation and development cycle
- Highly cost competitive entry level solution for mass market applications
- Pricing starts at \$0.25

STM32 Value Line

- High-performance Cortex-M3 1.25 DMIPS/MHz core
- Up to 7 PWM 16-bit timers including motor control
- Advanced analog with 12-bit ADC and DAC
- 16-Kbyte to 128-Kbyte embedded Flash
- 48-pin to 100-pin packages
- Pin-to-pin, software and peripheral compatibility across full family
- Volume pricing starts at \$0.85
