Pocket power estimator app for the iPhone

The Pocket Power Estimator (PPE) application for Apple's iPhone enables designers to see how Xilinx' 28nm programmable platforms stack up to alternatives in delivering the lowest power consumption for their systems. Designers can download the PPE from the Apple App Store and explore what-if-scenarios and get immediate feedback on the estimated power consumption compared to alternatives.

Adobe's vs touch apps for tablets

Adobe Systems Incorporated has announced Touch Apps—a family of six intuitive touchscreen applications designed for Android tablets and Apple iPad. The applications enable anyone to explore ideas and present one's creativity anytime, anywhere.

Inspired by Adobe Creative Suite software, these apps address multiple areas of creative process—image editing, ideation, sketching, mood boards, website and mobile app prototyping, and presenting finished work.

Skype video calling now on Droid Bionic

Skype has unveiled an update to Skype for Android app which will add support to a lot of Android devices. The update Skype 2.5 enables video calling to fourteen new Android phones and tablets. This has brought up the total number of supported Android devices to 41. Motorola Droid Bionic, LG Optimus 2x smartphones, along with Motorola Xoom and Samsung Galaxy Tab 10.1 are the new devices added to the list.
