

Control Systems Engineering: Fifth Edition

Suitable for upper-division college and university engineering students, the book explains the theory and practice of control systems engineering. The text emphasises on the practical applications of the subject to the analysis and design of feedback systems.

The book offers standardised chapter organisation, qualitative and quantitative explanations, examples, skill-assessment exercises and case studies.

The book also has illustrations, end-of-chapter problems and emphasis on computer-aided analysis and design for better understanding of the topic.

Micro And Smart Systems

Written for the undergraduate and first-year graduate students, this book emphasises on analytical and computational modelling. It offers in-depth discussion of mechanics, coupled multi-physics, electronics, control and scaling effects along with finite element analysis.

The book includes organised summaries of various devices and systems, details of packaging and integration, and representative case studies.

Acronyms and notations used in the book are provided in separate lists at the beginning. Also, a glossary of terms is included at the end of the book.

Theory And Practice Of DC Power Supply Systems

This book is for students, service and maintenance engineers, and design and application engineers alike. It focusses on the practical aspects of system design, manufacturing and testing procedures. There are various data sheets for component and power switching devices for easy selection and design support.

The book covers areas including technical terms on power supply, various types of controllers and its advantages, transformer and filter choke design, characteristics of rechargeable batteries, protective circuit for power supply, single-phase and three-phase converter with close loop circuit, etc.

Electronics For You Yellow Pages

Electronics For You Yellow Pages (EYP) is a sourcing guide for B2B buyers of electronics, and tech products and services in India. It is divided into various sections: Product Category Index—with over 2500-plus product categories listed in alphabetical order; Yellow Pages—earlier known as the Buyers' Guide, this section has possible sources for a given product category, with a list of firms that either manufacture, import or sell the respective products in India; Directory—with contact details of over 7000-plus organisations listed in alphabetical order; and Brand Index—an alphabetical listing of the brands with the name of the firms that own them.

Other useful sections include Addenda, Changes in Names, Government Organisations, Industry Associations and Ad-Index.
