

3D solar cells to offer higher level of efficiency

when light hits silicon are reabsorbed by the material before these reach the external circuit. The technology developed by Solar3D will counter this problem and the loss of light due to reflection.

Vacuum-like device for cellular exploration

Mohammad Ameen Qasaimeh and David Juncker from McGill's Department of Biomedical Engineering, and Thomas Gervais from the Ecole Polytechnique of Montreal have developed a floating microscopic device that would help to study the behaviour of living cells and a range of crucial cellular processes, from cancer cell formation to how neurons align themselves in the developing brain.

The device is based on quadrupoles, or paired identical objects—two 'positive' and two 'negative' arranged in a square in order to create a force field between them. Elec-

CAUTION NOTICE

Notice is hereby given to all concerned including the Manufacturers, Merchants and Traders dealing inter alia with "LED Aviation Obstruction Lighting Device" Our client, Kumar Krishna Rohatgi of Binay Opto Electronics Private Ltd. is the Patentee of Indian Patent No. 188995 of 9th May 1996 relating to "LED Aviation Obstruction Lighting Device". Therefore, it would not be lawful for any person without the written consent, of our client, to indulge in any act of MAKING, PURCHASING, USING (AS END-USER/CUSTOMER), OFFERING FOR SALE, SELLING OR IMPORTING such device in India during the subsistence of this patent.

It is further made known to all concerned that any unlawful act by any person would not be acceptable to our client, who may decide to take legal action against the infringers for such wrongful act in a Court of Law.

All concerned in the Trade and Commerce and hereby requested to contact the undernoted address or any further details regarding the above and to avoid unnecessary litigation and/or legal proceedings.

BINAY PowerLED Dome Type High Bay Light

Saves Money
Saves Energy
Better, Clearer, Spectrally Enhanced Light
Designed for Long and Reliable System Lifetime

BINAY's PowerLED Dome Type High Bay Luminaires are a one-to-one replacement for existing HID High Bay Luminaires, and offer low power consumption and a maintenance-free long life in an economical form factor

- Saves 65-70% power consumption over Metal Halide or HPSV
- Life of 10 to 15 years eliminates regular bulb and ballast replacement costs
- Instant turn-on to full brightness
- Full spectrum white light provides greater clarity and visual acuity; improves visibility and safety
