

Takes Over Where Others Fall Behind

350MHz Arbitrary/Function/Pulse Generators

Tabor's new WS8350 series (8351 single channel & 8352 dual channel) are 350MHz dual channel generators with the functionality of a function, arbitrary, modulation and pulse/pattern generator all in one easy to use, high performance, compact standalone bench top which enables engineers to test analog, digital and mixed signal devices with a single instrument.

Key Features of WS 8350 series Include:

- Single or Dual differential channels configured as separate or synchronized
- 350MHz Sine and 250MHz Square waves
- 2GS/s, 14-Bit, 512Kpoint arbitrary waveforms
- 4Vp-p into 50Ω (8Vp-p differential), double into open circuit
- AM, FM, FSK, PSK and Sweep modulations
- Powerful Pulse Composer TM for up to 350Mbit/s analog, digital and mixed signals device tests
- User friendly front panel with 4" color TFT LCD display
- Remote control through GPIB, USB2.0 and 1Gbit LAN with LXI Class C compliance
- Store/Recall capability on disk-on-key or 1GB internal memory
- Free Arb Connection software, IVI and MATLAB drivers
