SECURE WIRELESS ROUTER

CYBEROAM'S NetGenie INTEGRATES 3G-READINESS, ADVANCED INTERNET CONTROLS, INTERNET SECURITY AND MORE

To address the growing need for all-inclusive Internet security solutions within the reach of households and small offices, Cyberoam has introduced the NetGenie wireless router with advanced Internet controls and security features.

NetGenie offers a single-click solution for parents to implement age-wise parental controls ensuring their children are protected from Internet content like pornography and violence.

Users can decide how much Internet freedom to give to different users in their network across an entire range of devices such as desktops, laptops, smartphones and iPads. NetGenie also allows schedule-based Internet access over various website categories and applications for different users.
