

three transistors for each additional pixel. It also made distributing the light evenly more difficult, which, in turn, interfered with colour reproduction. This is why colours sometimes appeared slightly off or faded in larger LCD TVs. Today, advanced production techniques and LED backlighting technology have eliminated this problem in large-screen LCDs.

Features to look for

Resolution. Almost all 102cm (40-inch) or larger flat-panel TV sets have a resolution of 1080p (1920×1080 pixels). This resolution gives excellent details for almost all high-definition (HD) content. For some smaller HDTV sizes, 1366×768 pixels is often a lower-cost choice, but a 720p TV set has to scale 1080p images down to match its native resolution. This interpolation may introduce imaging artifacts and the image may not appear quite as sharp or have the depth of the picture on a 1080p set.

While 720p models are available in many sizes, as a lower-cost option, these are common in 102cm or smaller sizes. If you're shopping for a small HDTV, expect to pay 20 to 25 per cent premium for a 1080p TV set over a 720p set. All else being equal, a 1080p model will better match much of the content you can now get from streaming satellite services and the native resolution of a Blu-ray disc player.

Contrast ratio. It represents the total light output of the picture. Setting the contrast too high will obscure fine details. Contrast is usually kept high in retail stores to catch the attention of the buyer. Many a times, in a new TV set, the contrast is set to 100 per cent. You must set the contrast properly and reduce it to around 50 per cent.

Internet connectivity. Today, many TV sets come with Internet connectivity. The TV can be connected to the home network either through a cable or wirelessly. You can use your TV as the computer monitor and access content stored on your computer.

Samsung PS43D490 109.32cm (43-inch) Plasma TV

Features

- 3D HyperReal engine
- Micro dimming and 3D auto contrast
- Unique Plasma 1 design
- AllShare wireless connectivity

Price: ₹ 50,000

SANSUI BRUSH S4090XH-M 102cm (40-inch) LCD TV

Features

- DCODE engine
- Full HD
- Black brush finish
- 1920×1080 display resolution
- 2xUSB 2.0 (720p with Div-X)
- 3xHDMI 1.3 Version

Price: ₹ 39,990
