

Everything Micro: Microwave, Microsize and Microconsumption

The R&S®SMB100A signal generator family extended to 20/40 GHz

Right from the first glance, these signal generators are remarkable. Compact? Absolutely. Light? Without a doubt. And they even cover the frequency spectrum from RF to microwave and offer unprecedented cost-efficiency, without compromising on signal strength or quality.

- Wide frequency range from 100 kHz to 20/40 GHz
- Outstanding signal quality with excellent single side band phase noise, even at very low frequencies
- High output power of up to +27 dBm
- Low operating costs due to low power consumption
- Compact size (2 HU, $3\frac{1}{4}$ 19", 6.9 kg)

The low cost of ownership as well as fast level and frequency switching make these signal generators the perfect choice for users in every field. In addition, due to their compact size and low weight, they are ideal for mobile use.
