DELL INDIA
Rs 89,440 mn (2010-11)

Dell Inc., a multinational information technology corporation based in Texas, United States, develops, sells and supports computers and related products and services. The company bears the name of its founder, Michael Dell, and employs more than 103,300 people worldwide. India is a strategic market for Dell and one of the main reasons for this is that the country is an emerging market for the services business. India also has a very good resource base for the company in terms of talent. With a 23,000-member team, it has the second-largest workforce of Dell outside the US. Former Wipro CEO Suresh Vaswani was appointed chairman of Dell India and chief of applications and business process outsourcing organisation of Dell Services in April this year.

BHARAT ELECTRONICS LTD
Rs 57,727 mn (2010-11)

Bharat Electronics Ltd (BEL) was established by the government of India under the Ministry of Defence in 1954 to meet the specialised electronics needs of the Indian defence services. The Bengaluru-based company offers products and services in a wide spectrum of technology like radars, military communications, naval systems, electronic warfare systems, telecommunications, sound and vision broadcasting, opto-electronics, tank electronics, solar photovoltaic systems, embedded software and electronic components. With an aim to expand its non-defence or civilian businesses, BEL is foraying into areas like tablet PCs and solar energy. The public-sector defence electronics company has created a Rs 3000 tablet PC for the Ministry of Rural Development's poverty survey.

EXIDE INDUSTRIES LTD
Rs 47,909 mn (2010-11)

Exide Industries Ltd is a manufacturer of lead-acid storage batteries and power storage solutions provider. The company has six factories strategically located across the country—two in Maharashtra, two in Shannagar (mother plant) and Haldia (West Bengal), one in Tamil Nadu and one in Haryana. The battery maker recently cut production of most automobile products by ten to fifteen per cent in September, up from a five per cent cut in August, to reduce inventory and slowing demand for automobiles. Demand is likely to rebound from October, as higher sales in the festive season encourage automakers to increase production, leading to similar increases by component manufacturers.
