

PLAY WITH ARDUINO

Here we present some websites for students and hobbyists to build microcontroller-based projects. These websites are easily accessible to practice learning-by-doing

HacknMod

At HacknMod one can find hundreds of tutorials, do-it-yourself (DIY) projects, guides and even step-by-step video lessons to learn to hack and modify common game consoles. The site was launched in 2006 and has a team devoted to seeking out all the best hacks, mods and DIY projects around the web. HacknMod also presents a list of 'Top 40 Arduino Projects of the Web,' which includes projects such as 'Basic LED Cube-Learn to Make LED Cubes,' 'Web Based Servo Control' and 'Wall-avoiding robot.'

URL: <http://sheepdogguides.com/arduino/ahhtoc.htm>

sheepdogsoftware.co.uk

The site has a good collection of Arduino How Tos, Goodies and Projects. The page is helpful if you are looking for write-ups on how to do specific things with an Arduino. The site isn't only about how to do things, but it also provides information on good add-ons for your Arduino. The 'How Tos' section is divided into different levels according to complexity. The author has assumed that you have a working Arduino playing nicely with your computer.

Arduino Playground

Arduino is an Open Source physical computing platform based on a simple microcontroller board. Arduino Playground is a wiki where all the users of Arduino can contribute and benefit from their collective research. The Arduino official site has a section, where you can find a list of Arduino-based do-it-yourself project ideas. The list is helpful for both the novice and the experienced. The project ideas have been divided into three categories for easy navigation. The categories include 'Easy,' 'Intermediate' and 'Advanced.'

Instructables

The site documents a wide range of topics for people interested in science and technology. It has a good collection of 'how to' related documentation for almost everything on Arduino. It is a platform where passionate people share what they do and how they do it, and learn from and collaborate with the others. It also has videos, guides and contests related to Arduino.

Hack a Day

The site collects fresh hacks every day from around the web, as well as hacking related news. It has collection of over 600 Arduino hacks that keeps on growing daily as the site updates. The site also provides features to leave a comment and discuss on hacks.
