

# Why Relicell is the Right Battery for You

- Part of a Rs.1450 crore IT industry group
  - Wide range to suit any application
    - VRLA Batteries** - 12V,7AH to 12V,245AH  
12V,100AH to 2V,3000AH
    - Tubular Batteries** - 12V,40AH to 12V,200AH  
2V,40AH to 2V,600AH
  - Tested and certified by Central Power Research Institute, Bangalore (CPRI) and Electronic Test and Development Centre (STQC Directorate, Ministry of Information Technology, Govt. of India). *Download Test Certificates at [www.relicellbattery.com](http://www.relicellbattery.com)*
  - UL Certified
  - VRLA Batteries approved and registered in DGS&D for government purchases
  - 54 Service Centres across India - Assured single window service support across India and countrywide installation support.

## Blu-Ray Home Theater Systems

I read the article 'Blu-Ray Home Theater Systems' published in EFY August issue with great interest. I was amazed that with brief visit to malls, the author has provided us an ocean of knowledge on Blu-ray disc players—as standalone units or when integrated with powerful amplifier-based sound systems of various companies including Sony, Panasonic, Samsung, Philips and Bose.

The details about latest models with special features, beautiful photographs and price range provide enough inputs to go for a purchase as per our choice. The author also meticulously suggested about selection of room—preferably noiseless—for installation of the system to get crystal-clear and realistic surround-sound, or multi-channel stereo while watching movies in 2D or 3D format on big-screen LCD or LED TVs.

I will highly appreciate if you could provide us more updates through your magazine on technical information related to formats, features and storing of DVD/Blu-ray movie discs that are compatible in terms of stereo/5.1-channel/7.1-channel/multi-channel with Blu-ray players and audio-systems as advised by you. It will enable us to purchase the right stuff and save us from buying duplicate and pirated versions.

Let me share my experience in this regard. I was very impressed to see the demonstration of a home theatre system (make of well-reputed company) playing a DVD on LCD TV at a showroom. But I could not get the same enjoyment at my relative's home, who had the same make and model and was playing the same movie, as it was pirated, inspite of adjusting various modes of the DVD player and home theatre system's music. The query on this issue will be of immense help for buying high-end and

costly systems.

## EFY Online: eZine

I do not find the eZine version convenient to read. I miss EFY CD. Please continue providing the CD along with the magazine.

V. Madhan Kumar  
Through e-mail

**EFY:** We appreciate your feedback. However, the eZine on [efymag.com](http://efymag.com) website is not a replacement of the CD. It's a value-added service for our subscribers with following key benefits:

1. They get access to their magazine as soon as it goes to the press and ensures that no subscriber is left without access to the magazine content

2. It builds an archive for our subscribers so that they can refer to it whenever they want; without having to physically store the copies

The CD was removed after taking a poll of about 400 subscribers, wherein only 20 per cent preferred the CD option at Rs 70. The rest opted for plain copy. Unfortunately, the recent hike in pricing of raw materials and logistics constraints forced us to choose between the two options.

However, we will try and provide more information about electronics-related software through the magazine and make the website more useful. Please note that all the source codes of the published projects are available on [www.efymag.com](http://www.efymag.com) website.

## EFY projects

I am a student of electrical engineering. I want an electrical-electronics-based project. Please let me know the source where I can get an interesting university-level project.
