

and integrates logic level on/off control of the power MOSFET and its own circuitry.

It also has a soft-start function. Current consumption is less than one microampere in shutdown mode. Housed in a 2x3mm² TDFN-8 package, the CAT2300 is suitable for use over -40°C to +85°C operating temperature range.

LIGHTING

LED lantern

BPL Techno Vision has come up with a rechargeable LED lantern.

BPL Chirag uses Q Tech technology and requires only four hours for full charging to provide five hours of light with constant uniform luminescence. The technology allows charging even in fluctuating power and has the AC mains charging range from 90V to 260V.

Chirag is available in acrylic clear lamp cover. It uses 24 cool daylight white LEDs and is designed to provide 360-degree illumination. The light is powered by a 3.3V, 1600mAh battery.

LED bulkhead luminaires

Binay Opto has introduced PowerLED bulkhead luminaires in two models.

BK-6WL has a total wattage of eight watts, which is visual equivalent to incandescent general lighting service (GLS) bulbs of 60W. It consumes six watts and provides a minimum light output of 600 lumens. The BK-10WL has total wattage of ten watts, which is visual equivalent to incandescent GLS bulbs of 100W. It consumes ten watts

and provides a minimum light output of 900 lumens.

The luminaires come in cast-aluminium housing retaining mild steel cover wire frame that is powder-coated to about 0.7mm thickness for corrosion resistance. These bulkhead lights also feature toughened frosted glass cover, sealed to IP65 against dust and water ingress with neoprene rubber gasket.

STORAGE

Memory modules

Strontium Technology has unveiled 1600MHz speed-grade DDR3 memory modules. These modules for desktops and laptops come in 2GB and 4GB capacity.

The modules are compatible with motherboards that support the Sandy Bridge platform. These feature latency of 9-9-9-24 and 1.5V supply voltage. All memory modules are consistent and compatible with JEDEC standards, RoHS-compliant and carry a lifetime warranty.

Portable hard drive

Transcend Information has added StoreJet 25A3 to its StoreJet line of portable hard drives. The USB 3.0 portable hard drive delivers real-world

transfer speed of up to 90 MB/s. It comes bundled with Transcend Elite software and additional RecoveRx

software—a tool to bring back accidentally deleted or lost files.

StoreJet 25A3 is available in 500GB, 750GB and 1TB capacities and is backed by Transcend's three-year limited warranty.

Flash drive

Silicon Power has introduced its highest read/write speed USB 3.0 flash drive.

The 73x22x9mm³ Marvel M60 has maximum read-speeds of 100MB/sec and 30MB/sec in USB 3.0 and USB 2.0 mode, respectively. It has maximum write-speeds of 70 MB/sec and 20 MB/sec in USB 3.0 and USB 2.0 mode, respectively.

Encased in a metallic exterior, the 15gm drive has an LED indicator light that displays power-on and data-transfer status.

Marvel M60 comes in 32GB or 64GB storage capacity with a lifetime warranty, as well as SP Widget application software, providing seven back-up and security tools.
