

LED Driver Solutions for a Broad Range of Applications

LCD Backlighting

Infotainment
GPS
LCD HDTVs
LCD PC monitors
DVD players
Laptops

Automotive

Daytime running lights
Stop/turn/tail lights
Cluster and center stack backlighting
Interior lights
Puddle lights

Illumination and Signals

Headlamps
(mining, camping)
Interior decorative and ornamental lighting

Displays and Signage

Billboards
Channel letters
LED video displays
Message boards and scoreboards
Emergency lighting and exit signs

Allegro MicroSystems, Inc. offers a growing portfolio of LED drivers used for signs, display backlighting, architectural and automotive lighting applications.

Allegro's process technology and applications expertise has enabled the development of highly integrated LED driver ICs with on-chip FETs and diverse control options, providing flexibility and functionality in a small solution footprint.

Allegro's LED driver portfolio covers a wide variety of topologies, channel counts, output currents and feature sets to help customers optimize their solutions.

Features within the portfolio of devices include:

- Buck, Boost, Charge Pump, and Linear topologies
- Series and Parallel configurations
- Single and multiple (up to 16) channel outputs
- Output currents from 20 mA up to 3 A per channel
- Multiple intensity control methods including PWM control with high resolution per channel
- Current-control for color calibration (dot correction)
- Open LED and shorted LED detection
- Thermal shutdown and undervoltage lockout
- Automotive voltage and temperature ratings available
- Excellent current matching and accuracy
- Low quiescent current
- Multiple package options
