

MFR-1300

Desoldering System

Drive your productivity with next generation desoldering equipment.

The OK International team is always working on boosting your Training, Application and Productivity advantage. This is why we're delighted to announce that we've launched a next-generation desoldering system designed to do exactly that.

The MFR-1300 builds on the strength of our existing MFR technology with an innovative new design that allows the hand-piece to be used in two configurations; users can easily swap between a standard pencil-grip to a pistol-grip style.

- ▶ Extremely flexible desoldering tool for a variety of different applications
- ▶ Powered by SmartHeat® Technology, renowned for its productivity-boosting response & control
- ▶ Simple through-hole desoldering without compromise
- ▶ Dual switchable output for maximum versatility
- ▶ Innovative replaceable collection chamber with large capacity, reduces downtime with quick changeover capabilities
